They Were All Named.

A party of engineers were making a railway survey through the back woods hill country of Kentucky, and were boarding at the various farm-houses along their route. One day they stopped at a slatternly cabin for dinner. During the meal the housewife explained the lack of sufficient cutlery to go round by saying that the children had been playing with her knives and lost them. At that a precocious youngster at the foot of the table interrupted her with:

"Maw! Oh maw! They're all here!"

"Hush, Johnny!"

"But maw, they're all here!" and he rose in his place and pointed to each piece as he named them: "Big Butch, Little Butch, Case Knife and Stub."—Youth's Companion.

Sheep Raisers Complain of Dogs. If dogs could be suppressed the hilly and mountainous regions of the Allegheny range from Vermont down to Alabama would be ideal for sheep raising. The finest merino sheep in the world are raised in Vermont, only a few, it is true, but that is the fault of the dogs and not of the environment. Dog owners should be taxed and the proceeds used to reimburse sheep owners for losses.—New York Commercial.

SPENDING FOR CLOTHES

And No Wonder—Renting His Land He Made \$8.50 Per Acre.

So many Americans now have personal knowledge of Canada that false reports concerning this country are being continually corrected by Americans themselves who know the facts, and who are too fair-minded to let a false statement go unchallenged. A case in point arises out of a statement supposed to be made by a resident of Alberta, and published recently in the Spokesman-Review, of Spokane, in which the condition of settlers in this country was painted in a very bad way indeed. The writer of this attack on Canada refused to let his name be known, so it can be taken for what it is worth, but Mr. S. L. Wallace, of N. 4721 Crestline, Spokane, who lived for some years in Western Canada, came to the defense of the country in the following letter which was published in the Spokesman-Review of February 11, 1916:—

"To the Editor of the Spokesman-Review:—

"In Sunday's Spokesman-Review was a letter from a man in Alberta to the chamber of commerce, asking that something be done to keep Americans from going to Canada, and saying that that government was run by the railroads, banks and manufacturers; that once a man got there he never could get away. Had this man published that letter over his own signature there is no doubt but he could get out of Canada.

No country will do as much to help a man to get on his feet, if he tries to help himself, as Canada. I know of the government helping people to provisions, feed, seed grain and fuel, and charging only cost of delivery to the nearest town and 6 per cent. What more could a man ask?

I lived five years in Southern Saskatchewan and earned a patent to 320 acres of as good land as I ever saw. I have raised over 50 bushels of oats on sod, 40 bushels of wheat, and 20 of flax to the acre. Until I lost my health I never was better satisfied anywhere. I had my land rented this last year for one-third. It brought me almost \$8.50 per acre, or \$1,143.91 for 135 acres.

This man says he loves the land his fathers died for. So do I, and I love the land that gave me my home.

"S. L. WALLACE."

Cutting English Trees.

England has 125,000 acres of crown forests, containing magnificent trees untouched by the woodman's ax. Now they are to go. England needs the lumber and has appealed to Canada to provide a battalion of axmen. Needless to say, Canada has responded gladly. There is now organizing a battalion of 1,500 experienced bushmen, who will wear the khaki, be subject to military direction and wield their axes on the ancestral oaks of the motherland. Soon the music of their blows will be heard ringing through the great New forest of Hampshire and Dean forest, in Gloucestershire. England must have the wood, but it is sad to think of these glorious old trees 'disappearing. Many of the woodsmen will come from Quebec where experts in the craft abound.

The Last Request.

A kind physician living near Peoria, wishing to soothe the last hours of a poor woman whom he has been attending, asked her if there was anything he could do for her before she died. The poor soul, looking up, replied:

"Doctor, I have always thought I should like to have a glass butter dish before I died."

For Oiling Machinery.

The operation of oiling machinery, especially where it is desirable that the oil should be kept from the hands and clothing of the operator, has been devised recently in making use of the well-known collapsible lead capsules, so widely used for artists' colors, druggists' products, paste, etc., in the United States. The capsules are provided with a screw thread which is screwed into an adapter, which in turn is fastened to the part to be lubricated. The lead capsule and the brass adapter make a tight joint, and all that is necessary is to apply pressure from time to time, as desired. When the grease capsule is emptied, one merely unscrews it and puts a new one in its place. No refilling is necessary, and the pressure of the fingers is usually sufficient to force the grease into the bearing.

Something to Be Thankful For.

Only a fool man will laugh at a girl because she can't hit the side of a barn with a brick; he may marry her some day, then he will be glad that this is thus.

Unpopular Stand.

"Do you know how much the war is costing Europe every day?" asked the statistician.

"No," answered the busy man. "I only know the number of friends it has cost me in my home town to maintain strict neutrality."

Temperature Kept Right.

Freight cars for shipping bananas in winter are heated by half a dozen or so large oil stoves ranged down the center of the car. The temperature is kept at an average of 35 degrees.

Concentration of Wealth.

"A lot of moving picture stars get enormous salaries."

"Yes. After reading about the sums they draw, it seems strange that there's enough money left to carry on the war in Europe."

More Censure Than Praise.

"Another man who says his wife hasn't what he is."

"Well, he's grateful, at any rate."

"Nothing of the sort. This fellow has just been interviewed in a prison cell."

Look and Feel

Clean, Sweet and Fresh Every Day

Drink a glass of real hot water before breakfast to wash out poisons.

Life is not merely to live, but to live well, eat well, digest well, work well, sleep well, look well. What a glorious condition to attain, and yet how very easy it is if one will only adopt the morning inside bath.

Folks who are accustomed to feel dull and heavy when they arise, splitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, can, instead, feel as fresh as a daisy by opening the sluices of the system each morning and flushing out the whole of the internal poisonous stagnant matter.

Everyone, whether ailing, sick or well, should, each morning, before breakfast, drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary tract before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast the water and phosphate is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, bilious spells, stomach trouble, rheumatism; others who have sallow skins, blood disorders and sickly complexions are urged to get a quarter pound of limestone phosphate from any store that handles drugs which will cost very little, but is sufficient to make anyone a pronounced crank on the subject of internal sanitation.—Adv.

It sometimes happens that while a man is watching his enemies his friends get the best of him.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.
